

AROPEX LUMINA UV

Premium Weather Proof Glow

Exterior Emulsion

apollo paints
we love our planet

Apollo Paints AropeX Lumina UV is a premium exterior emulsion engineered with advanced lumina technology specially designed to withstand extreme tropical conditions. Delivers superior durability and long-lasting protection with excellent waterproofing while imparting an enhanced glow.

PERFORMANCE FEATURES:

Excellent Resistance against fungal & algal growth, offers excellent protection against alkali and UV degradation.

USP:

- ✓ UV Shield Protection
- ✓ Anti-algal & Anti-fungal formula
- ✓ Water Proof
- ✓ Exceptional Color Retention
- ✓ Rich Glow Finish

USAGE AREA:

On Exterior Plastered surfaces.

Most Ideal: For Apartments, Independent Houses, and High-end Commercial Buildings/Showrooms.

AVAILABLE PACK:

20, 10, 4 & 1 Ltr pack.

DIRECTIONS FOR USE:

SURFACE PREPARATION:

New Surfaces – Freshly plastered surfaces should be allowed to cure completely. Ensure the plaster is completely dry and thoroughly clean, free from any dust, flakes and dampness, etc. Make sure that all water leakages/seepages are repaired before painting.

Previously painted surface – Remove all loose particles, powdery material or defective paint by thorough wire brushing, scraping and water jetting (if required). If chalking or powdery surface persists, apply one coat of Apollo Paints Aroprime Exterior Primer or Instacare Nano Seal Ultra PU with the recommended dilution.

*In both the above-mentioned cases (Fresh Painting & Repainting), any previous growth of fungus, algae or moss needs to be removed thoroughly by vigorous wire brushing & cleaning with water.

RECOMMENDED UNDERCOATS:

Please Note: Application of undercoat is must for new plastered surfaces, while it is optional in the case of old/repainting surfaces.

*For waterproof warranty# (refer warranty clause) use Apollo Paints Instacare Damp Champ as recommended in PIS.

Alternatively, apply one coat of Apollo's Aroprime (Emulsion Based) Water Thinnable Exterior Primer with the recommended system.

*In case of excessive dampness use Apollo Paints Instacare Damp Guard or Nano Seal Ultra PU to limit further dampness. However, rectification of seepage source is the permanent solution to dampness.

FILLING:

- ✓ **CRACKS:** For filling cracks, up to 3mm use Apollo's InstaCare Crack Lock.
- ✓ **For Holes & Dents:** In case of dents and holes use Apollo's Wall Grace White Cement based putty or combination of white cement and fine sand in the ratio 1:3.

FINISH PAINT:

Finish coat: Apply a minimum of 2 coats of AropeX Lumina UV with a thinning ratio of one litre of paint with a maximum of 450ml of potable water. Ensure that horizontal surfaces like top of windows, ledges and sloped surfaces are painted with an additional coat for greater protection. Allow a minimum of 3-4 hrs. drying time between coats.

Maintenance Tips: For the best performance of the paint ensure proper washing and cleaning of all algal and fungal growth at regular intervals of six months.

COVERAGE **

On Primed Surface	Minimum Recommended Number of Coats	Coverage
By Brush / Roller Application	Two Coats	1 Coat 120 – 130 sq ft/ltr 2 Coats 60 – 70 sq ft/ltr

**Coverage depends on many factors like surface conditions, surface preparation, application skill, weather conditions, dilution etc. The coverage mentioned is under ideal conditions and will vary depending up on site conditions.

TECHNICAL DATA:

1	Thinning	Potable Water
2	Thinning Ratio for Light / Pastel shades	Maximum of 400 - 450ml of water per one liter of Paint.
3	Thinning Ratio for Vibrant/ Dark shades	Maximum of 250-300ml of water per liter of Paint.
4	Method of application	Brush / Roller
5	Drying Time	SD: 30 minutes
6	Pot life of thinned material	Use within 24hrs
7	Sheen Level	25 - 30 @ 60° GH
8	Flash Point	100% water-based paint, hence NA
9	Recommended Surface	Sand/Cement Plastered Surface, asbestos, brickwork, concrete block.
10	VOC (gm/ltr)	Meets the LEEDS VOC criteria as per Indian Green Building Council Version 1.0
11	Fire Hazard Class	Non - flammable
12	Safety Data	Refer MSDS

Brush / Roller

Non - flammable

Meets the LEEDS VOC criteria as per Indian Green Building Council Version 1.0

Shelf life: 3 years from date of manufacture in original tightly closed containers away from direct sunlight and excessive heat.

SAFETY MEASURES:

- ✓ Keep out of reach of children and away from eatables.
- ✓ Please refer to the product related MSDS which is available on request.
- ✓ May be harmful if swallowed. In case of ingestion seek immediate medical attention.
- ✓ Wear eye protection during application. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- ✓ In case of skin contact, immediately wash skin with soap and plenty of water. Get medical attention if irritation develops or persists.
- ✓ Do not breathe vapour or spray. It is recommended to wear suitable nose pad during sanding and surface preparation to avoid dust inhalation.
- ✓ Do not pour leftover paint down the drain or in water courses.
- ✓ No added Lead, Mercury or Chromium compounds.

PRECAUTIONS

- ✓ Do not apply when ambient temperature is less than 10°C or if the temperature might drop to this level within 4 hrs of application.
- ✓ Do not apply when humidity is greater than 90%. It may cause prolonged drying time of paint and moisture condensation on the walls.
- ✓ In high humidity areas, use of a Bio-wash solution is recommended to remove surface fungus growth, fungal spores, mould, etc. before application of the paint system.
- ✓ Stir well & strain before use. Tinted paints need thorough shaking immediately after tinter added as well as before use.
- ✓ For best performance, ensure that the surface is dry. The moisture level on the wall should be less than 14%. If the moisture level is more than the recommended level. Find out the source of water and address it before painting.
- ✓ Use diluted materials within 48 hours
- ✓ Keep the left-over paint container tightly closed to prevent drying.

SPECIAL NOTE *

Before painting the following things should be checked thoroughly:

- 1.pH value of the wall surface (Ideal condition between 7-10).
- 2.Moisture content of the wall (Ideal condition –below 12-14%).

If these are violated, Company will not be responsible.

*As per test conducted at Apollo R&D.
